DETAILED ACTION

Election/Restrictions

1. Acknowledgement is made to the election of Group II., Claims 21-50, for prosecution on the merits. Claims 1-20 and 51-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/1/2004.

2. Claims 21-50 further contain subject matter directed to the following patentably distinct species of the claimed invention:

- Species 1, as viewed in Figures 6-11, where the key is a separate T-shaped member;
- Species 2, as viewed in Figures 12-15, where the key is a separate plate member;
- Species 3, as viewed in Figures 16-17, where the pipe member comprises integral keyed mating grooves;
- Species 4, as viewed in Figures 18-21B, where the key is one or two integral ribs that matingly engages one or two finger slots;
- Species 5, as viewed in Figures 22-23, where a separate rod coupler matingly engages an integral rib; and
- Species 6, as described on page 8 of the specification, where the key is a separate pin element that engages an axially extending bore.

Art Unit: 3644

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.
4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
